SUBJECT: Hydrant Flushing

STEUBENVILLE – On May 14, 2019 as part of the Valve Replacement Project crews will begin Flushing Hydrants in the Labelle Water Service Area during the hours of 7am to 5pm. This work will affect the Labelle Hilltop area for the remainder of the week. The hydrant flushing will start on Pershing Avenue and Roosevelt Avenue. Once those streets are completed crews will be working south through the Labelle Hilltop from University Blvd to Washington Street.

Residents in these areas may experience water Quality Issues such as Loss of Water, Low Pressure, and Water Discoloration. If you experience any of these conditions Residents are asked to call the Water Filtration Plant at 740-283-6041. If water discoloration should happen residents should run the cold water only on their faucets or wash tubs to clear the discoloration from their service line. We ask that residents if possible withhold from washing white clothes during the hours of flushing to reduce the risk of discoloring the laundry.

We thank the residents of Steubenville for their patience and understanding throughout this very important project as we work to improve our Water System. Motorists are advised to allow extra time for their travels.
