SUBJECT: Valve Replacement Project – Downtown Market Street

---

**STEUBENVILLE** – Thursday evening September 26, 2019 starting at 6pm and continuing until completed the water department and contractors will be working to test an isolation sequence to shut the water off to the area of Market Street and Commercial Alley. This work is needed to investigate to further develop a replacement plan for a leaking 12 inch valve located at Market Street and Commercial Alley. This work will potentially affect the 100 block of N. 4<sup>th</sup> Street, 100 block of N. 5<sup>th</sup> Street, 400 block of Washington Street, and the 400 block of Market Street. This work is part of the Phase I and Phase II Valve and Waterline Replacement Project.

Due to the complexity of the Valve Replacement Project all residents in these areas may experience water quality issues such as Loss of Water, Low Water Pressure, or Water Discoloration. If you experience any of these conditions residents are asked to report the condition to the Water Filtration Plant at 740-283-6041.

We thank the residents of Steubenville for their patience and understanding throughout this very important project as we work to improve our Water System.
