SUBJECT: Vale Replacement Project- Valve Exercising and Assessments

---

**STEUBENVILLE** – Starting Today June 25, 2020 contractors will begin exercising and assessing valves throughout the city as part of the valve replacement project. This work is to finish assessments on the remaining 180 valves in the system that was not completed for various reasons during the first round of assessments. This work is expected to take place from June 25, 2020 until July 10, 2020. This work is not limited to a particular area as it will take place at various valve locations throughout the city's different pressure zones.

Due to the complexity of the Valve Replacement Project all residents in these areas may experience water quality issues such as Loss of Water, Low Water Pressure, or Water Discoloration. If you experience any of these conditions residents are asked to report the condition to the Water Filtration Plant at 740-283-6041. In the event that dirty water is present please refrain from running hot water to reduce the risk of the dirty water from getting in the hot water tank. Flush the cold water system in the residence for up to 3 minutes or until clear water is present.

We thank the residents of Steubenville for their patience and understanding throughout this very important project as we work to improve our Water System.
